EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David J. Cushing on March 2, 2005.

Amend claim 1:

1. (Currently amended) A waveguide directional filter arrangement comprising an input waveguide means, an output waveguide and an interconnected cascade assembly of two or more cavity resonators, wherein said input waveguide and said output waveguide each include broad wall sections joined by narrow wall sections whose aspect ratio is greater than 2:1, each said waveguide coupled via an aperture to an end cavity resonator of said cascade assembly, wherein each aperture includes a plurality of [inwardly extending] curved protrusions of approximately hemicycle shape extending into the aperture.

Allowable Subject Matter

Claims 1 – 12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1:

Tyrrell shows a waveguide filter arrangement comprising a plurality of apertures (12 or 13) in each iris plate, each aperture (12 or 13) comprising a plurality of inwardly curved protrusions of approximately hemicycle shape (where the inner and outer edges of 12 or 13 face the center of iris plate 5), but does not show each aperture includes a plurality of curved protrusions extending into the aperture, where in the case of aperture 12, only the inner edge extends into the aperture (e.g. facing the center of plate 5) while the opposite edge faces away from the aperture, nor does Tyrrell teach or suggest plural protrusion of each aperture facing inwardly (claim 1); and where Tyrrell does not teach or suggest an additional coupling element incorporating an external transmission line coupling one pair of non-adjacent resonators (claim 9).

Marie shows a filter arrangement comprising a plurality of apertures but does not show the apertures being hemicycle in shape, where Marie shows cross or triangular shaped apertures and where the plural curvilinear aperture of Tyrrell would not correspond to the aperture of Marie, thus the claims are found in condition for allowance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean O. Takaoka whose telephone number is (571) 272-1772. The examiner can normally be reached on 8:30a - 5:00p Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
